PROFILE

Computer engineering graduate with hands-on cybersecurity experience spanning security risk assessment, compliance mapping, vulnerability management and IAM/access governance. Designed and deployed an enterprise-grade security system audited against 7 compliance frameworks (OWASP, PCI DSS, GDPR, NIST, ISO 27001, CIS, SOC 2), including full risk cataloguing, control documentation and virtual patching of 37 CVEs. Performed SAP identity and access governance (SoD analysis, least-privilege role design, sensitive-transaction risk scoring) and penetration testing with structured remediation reporting across 8 client applications. Fluent English speaker, available for hybrid engagement in Brussels.

CORE SKILLS

GRC & Compliance : ISO 27001, NIST CSF, PCI DSS, GDPR, SOC 2, CIS Controls, OWASP Top 10, control mapping, compliance documentation, audit support

Risk Assessment : Threat modelling, risk scoring & cataloguing, MITRE ATT&CK mapping, control gap analysis, remediation planning, security reporting

Vulnerability Management : Web/API penetration testing (Burp Suite Professional, OWASP ZAP), vulnerability identification & classification, virtual patching, CVE tracking, remediation lifecycle

IAM & Access Reviews : SAP SU01/PFCG (users & roles), Segregation of Duties (SoD) analysis, least-privilege enforcement, JWT/OAuth2/RBAC, access certification

Security Monitoring : ELK Stack, Sigma rules, SIEM integration, incident tracking (TheHive), real-time alerting, log correlation

Tools & Systems : Nmap, Wireshark, Metasploit, Hydra, Linux/Kali, Python, Bash, PowerShell, Docker, Kubernetes, Git

PROFESSIONAL EXPERIENCE

Security Risk & Application Security Engineer — Intern (PFE)

01/2026 – 05/2026

Beehive Entreprises, Tunisia

- Led compliance mapping and control assurance for an enterprise security platform against 7 frameworks (OWASP, PCI DSS, GDPR, NIST, ISO 27001, CIS, SOC 2); documented risk assessments and remediation for every control gap.
- Catalogued and virtually patched 37 CVEs; ran 153 OWASP-scenario penetration tests with Burp Suite Professional and tracked results to closure.
- Built MITRE ATT&CK-based threat modelling (22 techniques) with APT attribution, feeding a structured risk register.
- Delivered technical documentation, audit evidence and security reporting for stakeholder review.

Junior Cybersecurity Specialist, Freelance (Part-Time)

01/2025 – 05/2026

Beehive Entreprises, Tunisia

- Conducted vulnerability assessments and penetration testing on 8 web and API applications; identified, classified and tracked findings through remediation.
- Produced detailed risk and remediation reports, translating technical findings into business risk language for client teams.

Cybersecurity Intern — SAP Identity, Access & Threat Governance

07/2025 – 08/2025

Streamlink, Tunisia

- Performed IAM/access governance in SAP: designed a least-privilege "Monitoring Basis" role, enforced Segregation of Duties (SoD) via SU01/PFCG analysis.
- Catalogued and risk-scored 7 sensitive SAP transactions (SU01, SE16N, PFCG, SM59, SE38), with CRITICAL/HIGH/MEDIUM classification and automated alerting.
- Built an automated detection-and-response pipeline (Python/RFC SDK → ELK → N8N → TheHive): detection <2 min, auto-blocking <7 min, 0% false positives, documented for audit traceability.

Network Security Intern

07/2024

Tunisie Telecom, Tunisia

- Assessed network security posture and identified 10+ vulnerabilities; built a SOC-oriented detection project with Elastic/Kibana and Sigma rules.

KEY PROJECTS

BeeWAF — Enterprise Security Platform, Risk & Compliance (PFE, graded 86/100)

2026

Risk Assessment, Compliance Mapping, ISO 27001/NIST/PCI DSS/GDPR/CIS/SOC 2

- Full risk lifecycle: threat modelling, control mapping to 7 frameworks, penetration testing, remediation tracking and audit documentation for a production-deployed system.
- 27 security controls, 37 CVE virtual patches, 18-layer evasion/detection review; 92.3% detection accuracy validated against CSIC 2010 benchmark (12,213 requests).

SAP Threat Detection & Access Governance System

2025

Python, PyRFC, ELK, N8N, TheHive, SoD Analysis

- Access review and risk-scoring framework for 7 critical SAP transactions; least-privilege role design and SoD compliance validation.
- Automated incident response tested against 3 attack scenarios (abnormal logins, privilege escalation, unauthorized access); 100% detection coverage.

SOC Analyst Project — Threat Detection & SIEM Integration

2024

Elastic Stack, Kibana, Sigma, Bash, PowerShell

- Built detection rules and investigation workflows for brute force and DNS exfiltration scenarios; documented findings for audit trail.

EDUCATION

Engineering Degree in Computer Science

09/2023 – 06/2026

National Engineering School of Tunis (ENIT), Tunisia

- Ranked 65th out of 600+ in the national engineering school entrance exam.

Preparatory Classes in Physics and Technology

09/2021 – 06/2023

Preparatory Institute for Engineering Studies, El Manar, Tunisia

CERTIFICATIONS

Networking — Cisco (2025) ; Fundamentals of Deep Learning — NVIDIA (2025) ; Exploring Adversarial Machine Learning — NVIDIA (2025) ; Machine Learning — NVIDIA (2024) ; Git & GitHub — 365 Data Science (2024).

LANGUAGES

English (B2, professional working proficiency) | French (Fluent) | Arabic (Native)
