PROFILE

Computer engineering graduate (ENIT) with hands-on offensive security experience: web/API penetration testing, WAF design and evasion research, vulnerability management and CVE remediation. Designed and deployed BeeWAF, an enterprise-grade Web Application Firewall combining 10,041 detection rules, 3 ML models and an 18-layer evasion-detection pipeline, tested against 153 OWASP attack scenarios with Burp Suite Professional. Comfortable working independently, documenting findings clearly, and translating technical vulnerabilities into actionable remediation for development teams. Strong IT affinity, eager to grow within a structured cybersecurity program and contribute to real projects from day one.

CORE SKILLS

Offensive Security & Penetration Testing : Web/API pentesting, Burp Suite Professional, OWASP ZAP, Metasploit, Hydra, Nmap, Wireshark, Kali Linux, XSS, SQLi, CSRF, fuzzing, authentication bypass, business-logic flaws

WAF & Application Security : WAF rule design (10,041+ rules), evasion-technique research (18-layer bypass testing), OWASP Top 10, API Top 10, virtual patching, DLP, anti-DDoS, anti-bot

Vulnerability Management : Vulnerability identification & classification, CVE tracking (37 CVEs virtually patched), risk scoring, remediation lifecycle, control-gap analysis

Detection & Threat Intelligence : ELK Stack, Sigma rules, SIEM integration, MITRE ATT&CK mapping (22 techniques), APT attribution, ML-based anomaly detection (RandomForest, GradientBoosting, IsolationForest)

Identity & Access : PKI (X.509 certificates), MFA, PAM, IAM, Segregation of Duties (SoD), least-privilege design, JWT/OAuth2/RBAC

Systems, Network & Automation : Windows Server, Active Directory, Linux (Ubuntu, CentOS, Kali, Debian), VPN, Proxy, Firewall, Python, Bash, PowerShell, Docker, Kubernetes, CI/CD (Jenkins, ArgoCD, GitHub Actions)

PROFESSIONAL EXPERIENCE

Security Engineer — Intern (Final-Year Project)

01/2026 – 05/2026

Beehive Entreprises, Tunisia

- Designed and deployed BeeWAF, an intelligent Web Application Firewall combining 10,041 detection rules and 3 ML models — 98.2/100 score, 0% false positives.
- Ran 153 OWASP-scenario penetration tests with Burp Suite Professional against the platform; built an 18-layer evasion-detection pipeline and virtually patched 37 CVEs across 27 security modules (anti-bot, DLP, anti-DDoS).
- Built MITRE ATT&CK-based threat modelling (22 techniques) with APT attribution; audited and mapped the platform to 7 compliance frameworks (OWASP, PCI DSS, GDPR, NIST, ISO 27001, CIS, SOC 2).
- Deployed via Jenkins (8-stage CI/CD) + ArgoCD GitOps on Kubernetes, with Prometheus/Grafana and ELK monitoring and real-time alerting.

Junior Cybersecurity Specialist, Freelance (Part-Time)

01/2025 – 12/2025

Beehive Entreprises, Tunisia

- Conducted vulnerability assessments and penetration testing on 8 web and API applications; identified, classified and tracked findings through remediation, producing detailed reports for client development teams.
- Administered and hardened Windows Server / Active Directory and Linux environments; configured and monitored VPN, proxy and firewall rules for client infrastructure projects.

Cybersecurity Intern — SAP Threat Detection

07/2025 – 08/2025

Streamlink, Tunisia

- Built an automated detection-and-response pipeline (Python/RFC SDK → ELK → N8N → TheHive): detection <2 min, auto-blocking <7 min, 0% false positives.
- Performed access governance in SAP (PAM/IAM): designed a least-privilege role, enforced Segregation of Duties (SoD) via SU01/PFCG analysis; risk-scored 7 sensitive transactions with automated Kibana alerting.

Network Security Intern

07/2024

Tunisie Telecom, Tunisia

- Assessed network security posture (VPN, firewall, segmentation) and identified 10+ vulnerabilities; built a SOC-oriented detection project with Elastic/Kibana and Sigma rules.

KEY PROJECTS

BeeWAF — Enterprise Web Application Firewall (Final-Year Project, graded 86/100)

2026

FastAPI, Python, ML, Docker, Kubernetes, ELK, PKI/MFA/PAM

- 27 security modules, 107 signatures (9,824 regex), 3 ML models, 18-layer evasion detection; ML evaluated on CSIC 2010 (12,213 requests): 92.3% accuracy, 98.2% precision, 89.8% F1, <20ms latency.
- GitHub: github.com/bahamouldi/beewaf_final.

SAP Threat Detection & Access Governance System

2025

Python, PyRFC, ELK, N8N, TheHive, SoD Analysis

- Automated incident response tested against 3 attack scenarios (abnormal logins, privilege escalation, unauthorized access); 100% detection coverage.

SOC Analyst Project — Threat Detection & SIEM Integration

2024

Elastic Stack, Kibana, Sigma, Bash, PowerShell

- Detection rules and investigation workflows for brute-force and DNS-exfiltration scenarios; documented findings for audit trail.

EDUCATION

Engineering Degree in Computer Science

09/2023 – 06/2026

National Engineering School of Tunis (ENIT), Tunisia

- Graduated 25/06/2026. Ranked 65th out of 600+ in the national engineering school entrance exam. Final-year project graded 86/100 (BeeWAF).

Preparatory Classes in Physics and Technology

09/2021 – 06/2023

Preparatory Institute for Engineering Studies, El Manar, Tunisia

CERTIFICATIONS

Networking — Cisco (2025) ; Fundamentals of Deep Learning — NVIDIA (2025) ; Exploring Adversarial Machine Learning — NVIDIA (2025) ; Machine Learning — NVIDIA (2024) ; Git & GitHub — 365 Data Science (2024).
