PROFILE

SAP BASIS and security engineer with hands-on experience at Streamlink (2 months internship). Built automated SAP threat detection system (Python/RFC SDK + ELK + N8N + TheHive), managed users/roles (SU01, PFCG), performed system monitoring (SM50-SM58, ST02/ST03N), deployed Fiori apps (SICF/OData), handled transports (TMS/STMS), backups (DB13) and patch management (SUM). Knowledge of SAP S/4HANA, SAP BTP, ASAP/Activate methodologies and compliance (SOX, ISO 27001).

CORE SKILLS

SAP Administration : SU01 (users), PFCG (roles), SoD analysis, authorization profiles, mandant management, RZ10/RZ11 profiles

SAP Monitoring : SM50/SM51 (work processes), SM04 (sessions), SM21 (sys logs), SM37/SM36 (jobs), SM12 (locks), SM58 (RFC), ST02 (buffers), ST03N (workload)

SAP Security & Compliance : Sensitive transaction detection (SU01, SE16N, PFCG), risk scoring, auto-blocking via BAPI, SOX/ISO 27001/RGPD

SAP Fiori & Transport : SICF (ICF services), OData activation (/n/iwfind/maint_service), Fiori Apps Library, TMS/STMS transports

Security Stack : Python/RFC SDK, ELK Stack (Elasticsearch, Kibana, Metricbeat), N8N (orchestration), TheHive (incident mgmt)

SAP Landscape : DEV/QAS/PRD environments, ASAP & SAP Activate methodologies, SAP S/4HANA, SAP BTP, DB13/BRTTools backups, SUM patching

Tools & Systems : Wireshark, Nmap, Burp Suite, Linux/Kali, Bash, PowerShell, Docker, Git

PROFESSIONAL EXPERIENCE

Cybersecurity Intern — SAP Threat Detection

07/2025 – 08/2025

Streamlink, Tunisia

- Built automated SAP threat detection: Python scripts + RFC SDK for real-time log collection, ELK for centralization, N8N for alert orchestration, TheHive for incident tracking. Detection <2 min, auto-blocking <7 min, 0% false positives.
- Managed SAP users/roles (SU01, PFCG): created "Monitoring Basis" role with 10 transactions (SM50-SM58, ST03N, AL08, DB02), enforced least-privilege and SoD compliance.
- Monitored sensitive transactions (SU01, SE16N, PFCG, SM59, SE38): risk-catalogued 7 critical tcodes, automated scoring and real-time alerting via Kibana dashboards.
- Deployed Fiori apps: activated ICF services (SICF), OData services, created PFCG roles with Business Catalogs/Groups/Spaces for Fiori Launchpad access.
- Handled transports via TMS/STMS (DEV → QAS → PRD), backup schedules (DB13), patch analysis (SUM) and system profile tuning (RZ10/RZ11, ST02).

Junior Cybersecurity Specialist — Stagiaire PFE

01/2026 – 05/2026

Beehive Entreprises, Tunisia

- Penetration testing on 8 web and API applications, produced multiple detailed remediation reports.

Network Security Intern

07/2024

Tunisie Telecom, Tunisia

- Assessed network security posture, identified 10+ vulnerabilities, built SOC detection project with Elastic/Kibana and Sigma rules.

KEY PROJECTS

SAP Threat Detection & Response System

2025

Python, PyRFC, ELK, N8N, TheHive

- Full SOC pipeline: Python/RFC SDK collects logs from SAP tables (USR02, UST04, STOR) → Metricbeat → Elasticsearch → Kibana dashboards (security, performance, user activity) → N8N workflows → TheHive cases.
- Sensitive transaction monitoring: catalogued 7 critical tcodes (SU01, SE16N, PFCG, SM59, SE38, SA38, SE10) with risk levels (CRITICAL/HIGH/MEDIUM), automated risk scoring per user activity.
- Auto-response: BAPI_USER_EXISTENCE_CHECK + BAPI_USER_LOCK + BAPI_TRANSACTION_COMMIT for instant blocking. Tested 3 attack scenarios: abnormal logins, privilege escalation, SU01 unauthorized access.
- Results: detection <2 min, response cycle <7 min, 0% false positives, 100% attack coverage. Kibana panels: failed logins/hour, sensitive tx heatmap, risk distribution, real-time alerts.

BeeWAF — Intelligent Web Application Firewall (PFE)

2026

FastAPI, ML, Docker, Kubernetes, ELK

- Enterprise WAF: 10,041 rules + 3 ML models (RandomForest, GradientBoosting, IsolationForest). 27 modules: anti-bot, DLP, anti-DDoS, virtual patching (37 CVEs).
- Compliance with 7 frameworks (OWASP, PCI DSS, GDPR, NIST, ISO 27001, CIS, SOC 2). Score 98.2/100, 0% false positives on all test datasets.
- Architecture: FastAPI backend, Docker/Kubernetes deployment, ELK monitoring dashboards, automated alerting for enterprise SOC teams.

EDUCATION

Engineering Degree in Computer Science

09/2023 – 06/2026

ENIT, Tunisia

Preparatory Classes (Physique-Technologie)

09/2021 – 06/2023

IPEI El Manar, Tunisia

CERTIFICATIONS

Networking — Cisco (2025) ; Deep Learning — NVIDIA (2025) ; Adversarial ML — NVIDIA (2025) ; Machine Learning — NVIDIA (2024) ; Git & GitHub — 365 Data Science (2024).
