PROFILE

Computer engineering graduate (ENIT, Mention Très Bien) with hands-on, production-grade DevOps experience: built and operated a CI/CD pipeline (Jenkins + ArgoCD GitOps) deploying a containerized system on a 5-node Kubernetes cluster, with full observability (Prometheus, Grafana, ELK Stack). Comfortable with Linux administration, Docker, Kubernetes manifests, Bash/Python automation scripting, and AWS fundamentals. Early exposure to Infrastructure as Code (Terraform). Self-motivated, remote-ready, and used to owning infrastructure and deployment tasks end-to-end. Seeking a DevOps Engineer role to grow into cloud and automation at scale.

CORE SKILLS

Containers & Orchestration : Docker, Docker Compose, Kubernetes (Deployment, Service, Ingress, PVC, Secrets, ConfigMap), Helm-ready manifests
CI/CD & GitOps : Jenkins (multi-stage pipelines), ArgoCD (GitOps), GitHub Actions, GitLab CI, zero-downtime rolling updates
Cloud : AWS (EC2, S3, VPC, IAM, RDS, CloudWatch), Azure (fundamentals), exposure to GCP
Infrastructure as Code : Terraform (manifests, provisioning), Kubernetes YAML, Docker Compose
Monitoring & Logging : Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), real-time alerting, dashboards
Scripting & Automation : Python, Bash, PowerShell, automation scripts, deployment workflows
Systems & Networking : Linux (Ubuntu, Debian, Kali), TCP/IP, DNS, routing, system hardening, Wireshark, Nmap
Version Control & Tools : Git, GitHub, GitLab, Docker Hub, Harbor registry

PROFESSIONAL EXPERIENCE

DevOps / Security Engineer — Intern (PFE, Mention Très Bien) 02/2026 – 06/2026
Beehive Entreprises, Tunisia

- Built and deployed a production system on a 5-node Kubernetes cluster (3 masters + 2 workers, Calico CNI): complete manifests (Deployment, Service, Ingress, PVC, Secrets), health/liveness probes, resource sizing.
- CI/CD pipeline: Jenkins (8 stages) + ArgoCD (GitOps), zero-downtime rolling updates (maxUnavailable: 0, maxSurge: 1).
- Full observability stack: Prometheus/Grafana dashboards (26 panels), ELK Stack log pipeline (Filebeat → Logstash → Elasticsearch → Kibana), real-time alerting.
- Wrote Python/Bash automation scripts for deployment, monitoring and reporting tasks.

Full-Stack Developer, Freelance 01/2024 – 05/2026
Beehive Entreprises, Tunisia

- Delivered 5+ full-stack applications with Docker containerization and Jenkins CI/CD deployment.
- Managed PostgreSQL/MySQL databases, REST APIs, and Kubernetes deployments for client projects.

Cybersecurity Intern — SAP Threat Detection 07/2025 – 08/2025
Streamlink, Tunisia

- Automated log collection pipelines (Python), ELK-based dashboards, real-time alerting via N8N orchestration.

Network Security Intern 07/2024
Tunisie Telecom, Tunisia

- Linux system administration, network traffic analysis, Elastic/Kibana dashboards, identified 10+ vulnerabilities.

KEY PROJECTS

Production Kubernetes Infrastructure — CI/CD & Observability 2026
Docker, Kubernetes, Jenkins, ArgoCD, Prometheus, Grafana, ELK

- Full Kubernetes cluster deployment: manifests, node affinity, health probes, resource sizing, zero-downtime rolling updates.
- CI/CD: Jenkins (8 stages) + ArgoCD (GitOps). Monitoring: Prometheus/Grafana, ELK Stack, real-time alerting. Latency overhead <20ms in production.

Containerized Microservices Architecture 2026
TypeScript, Node.js, Docker, Kubernetes, REST API

- Distributed application: decoupled services, container orchestration, Docker-based CI/CD-ready structure.

Real-Time Streaming Pipeline — Kafka + PySpark 2024
Kafka, PySpark, PostgreSQL, Docker Compose

- Event-driven architecture (6 Docker Compose services): Kafka producer/consumer, PySpark Structured Streaming, windowed aggregation, PostgreSQL via JDBC.

Containerized E-commerce Platform — Fedi Phone 2026
Next.js, TypeScript, PostgreSQL, Docker

- Full-stack application: Dockerized PostgreSQL, JWT auth, Docker Compose deployment.

EDUCATION

Engineering Degree in Computer Science — Highest Honors (Mention Très Bien) 09/2023 – 06/2026
National Engineering School of Tunis (ENIT), Tunisia

- Ranked 65th out of 600+ in the national engineering school entrance exam. Defended 06/25/2026.

Preparatory Classes in Physics and Technology 09/2021 – 06/2023
Preparatory Institute for Engineering Studies, El Manar, Tunisia

CERTIFICATIONS

Networking — Cisco (2025) ; Git & GitHub — 365 Data Science (2024) ; Fundamentals of Deep Learning — NVIDIA (2025) ; Machine Learning — NVIDIA (2024).
