**To the Hilti Recruitment Team**

**Subject: Application for Intern – Cybersecurity (m/f/x), Offensive Security track – Buchs, St. Gallen**

Dear Hiring Team,

I am writing to apply for the Cybersecurity Internship at Hilti, with a particular interest in the Offensive Security track. I recently graduated as a Computer Engineer from the National Engineering School of Tunis (ENIT), with hands-on experience in penetration testing, Web Application Firewall design and vulnerability management, and I am excited by the opportunity to grow within a structured, mentored cybersecurity program at a global company that treats security as a genuine business enabler.

During my final-year project at Beehive Entreprises, I designed and deployed BeeWAF, an enterprise-grade Web Application Firewall combining 10,041 detection rules, three machine-learning models and an 18-layer evasion-detection pipeline. I ran 153 OWASP-scenario penetration tests with Burp Suite Professional, virtually patched 37 CVEs, and mapped the platform to MITRE ATT&CK and seven compliance frameworks (OWASP, PCI DSS, GDPR, NIST, ISO 27001, CIS, SOC 2). In parallel, through freelance missions at Beehive, I conducted penetration testing on 8 web and API applications and produced detailed remediation reports, and I administered Windows Server/Active Directory and network security controls (VPN, proxy, firewall) for client infrastructure. My internship at Streamlink further developed my skills in automated threat detection and access governance on SAP systems, and my internship at Tunisie Telecom gave me a first grounding in network security assessment and SOC-style detection with the ELK stack.

I would welcome the chance to bring this offensive-security and application-security background to your team, contribute to real projects from day one, and keep learning from experienced mentors across your cybersecurity program.

In the interest of transparency, I would like to flag two points for your consideration: I graduated in June 2026 and am not currently enrolled in a Master's program, and as a Tunisian citizen I do not currently hold a Swiss or Liechtenstein work permit and would require sponsorship. I understand these may affect my eligibility for this specific internship, and I would be grateful for your guidance on whether my profile can still be considered, or referred to another suitable opportunity within Hilti.

Thank you for considering my application. I would welcome the opportunity to discuss my experience and motivation further.

**Baha Eddine Belhaj Mouldi**
