Dear Hiring Team,

Subject: Application — Junior Analyst Engineer (F/H)

A recent computer engineering graduate from the National Engineering School of Tunis (ENIT), specialized in Data Analytics and Artificial Intelligence, I am excited to begin my career at Deloitte, a global leader in consulting and audit. Your mix of Audit, Data Analytics, AI and ESG missions and your international environment match exactly the challenging setting I am looking for.

My background shows my ability to turn data into value:

- **Data Analytics:** built a revenue-assurance dashboard for Tunisie Telecom processing nearly 900,000 records, with predictive dashboards and an analytical RAG chatbot (Gemini).
- **AI & ML:** production Machine Learning models (RandomForest, GradientBoosting), multi-agent systems, Python pipelines (Scikit-learn, Pandas) and data mining (K-Means clustering, SHAP explainability).
- **Analytical rigor:** my final-year project enforces compliance with several frameworks (ISO 27001, NIST, PCI DSS), a methodical, audit-oriented approach.
- **Teamwork:** technical project lead of a 4-person team (ranked 1st at ENIT).

Curious, analytical and comfortable working in English, I am mobile and available to relocate to Paris La Défense and fully committed to this opportunity in France.

I would welcome the chance to discuss my motivation in an interview.

Baha Eddine Belhaj Mouldi
