PROFILE

Computer Engineering graduate (ENIT, Mention Très Bien, 06/2026) with production-grade DevOps experience and a strong fit for XE-FORT's 100% Remote DevOps Engineer role open to freshers and recent graduates. Built and operate a full CI/CD and observability stack for a production system on a 5-node Kubernetes cluster (Docker, Kubernetes, Jenkins + ArgoCD GitOps, Prometheus/Grafana, ELK Stack) with **zero-downtime rolling updates** and **<20ms latency overhead**. Self-motivated, ownership-driven, and experienced in remote collaboration with distributed teams (developers, QA, infrastructure). Passionate about automation, cloud infrastructure, and reliable systems — seeking to grow through hands-on real-world projects, mentorship, and long-term PPO commitment.

CORE SKILLS — MATCHED TO XEFORT PREFERRED SKILLS

Linux / Git : Linux (Ubuntu/Debian/Kali, administration, troubleshooting), Git & GitHub (Git, GitHub, GitLab, branching, code review)
Docker / Kubernetes : Docker, Docker Compose (multi-stage, hardening), Kubernetes (Deployment/Service/Ingress/PVC/Secrets/ConfigMap, Helm-ready, Calico CNI, probes)
CI/CD : Jenkins (8 stages), GitHub Actions, GitLab CI, ArgoCD (GitOps), zero-downtime rolling updates (maxUnavailable: 0)
Cloud : AWS (EC2/S3/VPC/IAM/RDS/CloudWatch), Azure, GCP fundamentals
IaC : Terraform (provisioning, remote state), Ansible (automation, config management), Kubernetes YAML
Scripting : Python, Bash, PowerShell — deployment, monitoring & reporting automation
Monitoring & Logging : Prometheus/Grafana (26 panels), ELK Stack (Filebeat→Logstash→Elasticsearch→Kibana), real-time alerting
Networking : TCP/IP, DNS, routing, VPC, security groups, load balancing, Wireshark, Nmap

PROFESSIONAL EXPERIENCE

DevOps / Security Engineer — Intern (PFE, Mention Très Bien, 86/100) 02/2026 — 06/2026
Beehive Entreprises, Tunisia — Remote

- **Build/maintain/improve CI/CD pipelines:** Jenkins 8 stages + ArgoCD GitOps, zero-downtime rolling updates (maxUnavailable: 0), automated testing, staged rollouts/fast rollbacks.
- **Deploy & manage apps on cloud/server:** 5-node K8s cluster (3 masters + 2 workers, Calico), manifests (Deployment/Service/Ingress/PVC/Secrets), health probes, autoscaling.
- **Docker/Kubernetes & containerized apps:** Hardened images, resource limits, full deployment ownership.
- **Automate infrastructure/deployment:** Python/Bash automation + Terraform/K8s YAML IaC for provisioning and reporting.
- **Monitor performance & troubleshoot:** Prometheus/Grafana (26 panels) + ELK (Filebeat→Logstash→Elasticsearch→Kibana), real-time alerting, <20ms latency; root-cause remediation, reliability/scalability best practices.
- **Security & collaboration:** Least-privilege, Secrets, network policies, 7-framework compliance (ISO 27001/NIST/PCI DSS/GDPR/CIS/SOC 2/OWASP); daily remote collaboration with dev/QA/infra, end-to-end ownership.

Full-Stack Developer, Freelance (Remote) — 5+ Production Applications 01/2024 — 06/2026
Beehive Entreprises, Tunisia

- Delivered containerized full-stack applications (Node.js, FastAPI, Spring Boot, React/Angular) with Docker and Jenkins CI/CD; managed PostgreSQL/MySQL and REST APIs on Kubernetes.
- Remote work with client teams across time zones; Git/GitHub workflows, code review, and deployment ownership.

Cybersecurity Intern — Automated Threat Detection Pipeline 07/2025 — 08/2025
Streamlink, Tunisia

- Built ELK-based monitoring and N8N orchestration for real-time log collection and alerting; Python automation for log correlation and dashboarding.

Network Security Intern 07/2024
Tunisie Telecom, Tunisia

- Linux administration, Elastic/Kibana dashboards, Sigma rules; identified 10+ network vulnerabilities via traffic analysis (Wireshark/Nmap).

KEY PROJECTS

Production Kubernetes Infrastructure — CI/CD & Observability (PFE) 2026
Docker, Kubernetes, Jenkins, ArgoCD, Prometheus, Grafana, ELK, Terraform

- End-to-end cluster: manifests, node affinity, health probes, resource sizing; Jenkins 8 stages + ArgoCD GitOps; Prometheus/Grafana + ELK with real-time alerting; <20ms overhead in production filtering live traffic for 2 enterprise apps.

Containerized Microservices & Real-Time Pipeline 2024 — 2026
TypeScript, Node.js, Docker, Kubernetes, Kafka, PySpark, PostgreSQL

- Distributed microservices with container orchestration; event-driven 6-service Docker Compose stack: Kafka producer/consumer, PySpark Structured Streaming, windowed aggregation to PostgreSQL via JDBC.

EDUCATION

Engineering Degree in Computer Science — Highest Honors (Mention Très Bien) 09/2023 — 06/2026
National Engineering School of Tunis (ENIT), Tunisia

- Ranked 65th / 600+ national entrance exam. PFE defended 25/06/2026, grade 86/100. ENIT is Tunisia's top engineering school.

Preparatory Classes in Physics and Technology 09/2021 — 06/2023
Preparatory Institute for Engineering Studies, El Manar (IPEIEM), Tunisia

CERTIFICATIONS

Networking (CCNA) — Cisco (2025); Git & GitHub — 365 Data Science (2024); Fundamentals of Deep Learning — NVIDIA (2025); Machine Learning — NVIDIA (2024).

LANGUAGES

French (Fluent) | English (B2, professional) | Arabic (Native) — fully operational in 100% remote English/French distributed teams.
