Hiring Team

Corintis — Information Security & Compliance

Attn: Mr. Benoit Ramillon, Head of IT Security and Compliance

EPFL Campus, Lausanne, Switzerland

Subject: Application for Information Security Officer (ISO) — GRC / ISMS — Lausanne

Dear Mr. Ramillon and the Corintis Security Team,

I am writing to apply for the **Information Security Officer (ISO)** role you posted 12 hours ago on LinkedIn — *“No compliance theater here. Help build a mature, pragmatic, and scalable security program for a fast-growing deep-tech company.”* As a Computer Engineering graduate from ENIT (Mention Très Bien, June 2026) with a **strong GRC background and hands-on Information Security experience across ISO 27001, SOC 2 and GDPR**, your description resonated immediately: it is exactly how I work.

During my PFE at Beehive Entreprises I shaped and executed an information security program from scratch for a production system (BeeWAF), blending governance, risk, compliance and hands-on implementation — no checklist exercise:

- **Risk & gaps:** MITRE ATT&CK threat modelling (22 techniques, APT28/29), risk cataloguing (CRITICAL/HIGH/MEDIUM), gap analyses vs. **7 frameworks (ISO 27001/SOC 2/GDPR/NIST/PCI DSS/CIS/OWASP)** with risk register and KPIs; 153 OWASP scenarios (Burp Pro) for validation.
- **Pragmatic controls:** 27 controls (anti-bot/DLP/anti-DDoS, 18-layer evasion) and 37 CVE virtual patches — each control practical, measurable and auditable, fully documented req. → test.
- **Audits & customer assessments:** Audit evidence for ISO 27001/SOC 2 with complete traceability, reused for customer security assessments; production system (<20ms, 92.3% accuracy CSIC 2010, 0% FP) defended 86/100.
- **Beyond GRC:** IAM (SAP SU01/PFCG, SoD, RBAC, quarterly reviews), AppSec (8 apps pentested), incident response (TheHive/ELK/Sigma, detection <2 min, auto-block <7 min) and business continuity awareness.

What you emphasize — turning risks into practical controls, bringing structure without bureaucracy, and working with auditors/customers/leadership/technical teams — is exactly where I thrive. Fluent in **French** (ideal for Lausanne) and **English**, I am drawn to Corintis' deep-tech, EPFL, no-BS, high-ownership culture: next-gen cooling for AI chips is real impact.

I am open to **relocation to Lausanne** (on-site EPFL) and to discussing work-permit practicalities transparently, and I can contribute day one on risk assessments, gap analyses, audit support, control design, KPI/risk management, customer assessments and culture building alongside the Head of IT Security & Compliance.

I would be honoured to help build a security program engineers trust — not just policies and dashboards. My CV and portfolio are at bahamouldi.github.io/portfolio.

Thank you for your consideration. I would welcome the opportunity to discuss my experience and motivation further.

Baha Eddine Belhaj Mouldi
