Hiring Team
XEFORT SOLUTIONS
Remote — DevOps Engineer

Subject: Application for DevOps Engineer (Remote) — Freshers & Experienced — 100% Remote / Work From Home

Dear XEFORT Hiring Team,

I am writing to apply for the **DevOps Engineer (Remote)** role you posted 8 hours ago on LinkedIn — a 100% Remote opportunity explicitly welcoming **freshers, recent graduates and junior DevOps engineers**. As a Computer Engineering graduate from ENIT (Mention Très Bien, June 2026) with production-grade, hands-on DevOps experience, I was immediately drawn to your emphasis on *real-world cloud projects, ownership, automation and mentorship*.

During my PFE (86/100) at Beehive Entreprises I built and operated the exact stack you describe: a **5-node Kubernetes cluster** (Calico CNI) with full manifests, **Docker** hardened images, and a **CI/CD pipeline (Jenkins 8 stages + ArgoCD GitOps)** with zero-downtime rolling updates. Observability is **Prometheus/Grafana (26 panels) + ELK Stack (Filebeat → Logstash → Elasticsearch → Kibana)** with real-time alerting; the system filters live production traffic for 2 enterprise apps at <20ms overhead. I automate with **Python/Bash**, provision with **Terraform/K8s YAML**, and troubleshoot deployment/infrastructure/production issues end-to-end. Earlier freelance work (01/2024–06/2026) delivered 5+ containerized apps (Node.js/FastAPI/Spring Boot) with Docker + Jenkins, always **remote** with distributed dev/QA/infra teams.

Your *Preferred Skills* map directly to my daily tools: **Linux, Git & GitHub, Docker, Kubernetes, CI/CD (GitHub Actions/Jenkins/GitLab CI), AWS** (EC2/S3/VPC/IAM/RDS/CloudWatch) + Azure/GCP fundamentals, **Terraform/Ansible, Bash/Python, Monitoring & Logging** and **Networking fundamentals**. Security, reliability and scalability (least-privilege, Secrets, network policies, resource sizing) are standard in my work.

Self-motivated and remote-ready, I take ownership of infrastructure and deployment tasks and enjoy solving problems collaboratively. The chance to gain hands-on experience on real projects with mentorship and a **PPO/full-time path** is exactly the trajectory I seek after my PFE.

Thank you for considering my application. I am available for an interview at your convenience and would welcome the opportunity to discuss how my experience aligns with your roadmap. My CV and portfolio are attached and at bahamouldi.github.io/portfolio.
